HYPER-SIMPLIFY HYPERCONVERGE WITH LENOVO

Businesses are using hyperconverged infrastructure (HCI) to untangle today's big IT challenges. HCI can help you accelerate workloads, meet growing storage needs, gain the commercial benefits of hybrid cloud and more - all with easy-to-manage building blocks.

Get certified HCI solutions for your business with Lenovo®, Microsoft® and Intel®. They combine rock-solid Lenovo servers with Microsoft Azure Stack™ HCI - the only HCI platform from a public cloud leader, that are powered by Intel Xeon® Scalable processors. You have the perfect partnership of industry leaders in an end-to-end solution.

LENOVO MAKES HCI EVEN BETTER

Meet the Lenovo ThinkAgile™ MX Certified Node powered by Intel® Xeon® Scalable processors for Microsoft Azure Stack HCI. It provides hybrid cloud HCI in a box with powerful competitive advantages.

Hybrid Cloud Flexibility

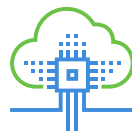

You have a ready-made, enterprise-class hybrid platform. Migrate chosen workloads to cloud, keep others on-premise and extend to Azure™ services with ease.

Single Pane Management

Windows Admin Center, Lenovo XClarity™ and Azure Stack™ are integrated to provide time-saving management of all your infrastructure, virtual machines and software.

Configured and Managed for You

Infrastructure is pre-configured to deploy right away. With ThinkAgile Advantage support, you have all the services you need for the full lifecycle of your solution.

TURN SIMPLE HCI INTO SERIOUS ROI

If you want modern IT with the fastest time-to-value, you need the best in cloud economics, reliability and affordability. Lenovo HCI solutions bring all three together

MORE VALUE IN-CLOUD AND ON-PREMISE

Take advantage of the commercial opportunities of the cloud, including flexible low-cost storage, backup and monitoring. With industry-leading virtual machine performance, you can gain higher performance at a lower cost, many use cases, such as Remote Office/Branch Office (ROBO), Virtual desktop infrastructure (VDI), data centre consolidation, database and more.

#1 IN RELIABILITY FOR A REASON

Lenovo HCI solutions are pre-validated and pre-configured to provide extreme availability. Certified hardware components keep on delivering value while minimising outage costs. No wonder Lenovo, for the last 8 years has been ranked #1 in independent x86 server reliability¹ and customer satisfaction surveys.²

SAVE, AND KEEP SAVING

Lenovo helps you minimise total cost of (TCO) by selecting from flexible configuration options to meet your performance needs. With ThinkAgile MX Certified Nodes powered by Intel® Xeon® Scalable processors, your Microsoft Windows Server® Data center licenses are included. You have all the software-defined features, and management tools you need, with 30-50% savings

Lenovo and Microsoft™

With co-located engineering teams and a history of collaboration, Lenovo with Intel® Xeon® Scalable processors and Microsoft™ deliver innovative joint solutions, for growing businesses. With Lenovo's leadership in performance, reliability and Microsoft's leadership in software and cloud, you can make the right investment in HCI.

A ROLLING START ON AN OPEN ROAD

Lenovo

Traditional IT has you constantly reinventing the wheel and working to keep it spinning. Accelerate value right off the starting line with pre-defined Lenovo HCI solutions, which provide simplified deployment, management and scaling.

Lenovo HCI solutions give you the power of Intel® Xeon® Scalable processors, the flexible economics of hybrid cloud and the renowned reliability of Lenovo hardware. And it's all in a certified, turnkey solution that simplifies everything.

SPEND LESS TIME ON UAT

Design, user acceptance testing (UAT), deployment and maintenance of traditional IT is a time-consuming challenge. With Lenovo ThinkAgile MX Certified Nodes, it's a solved problem. You have a pre-tested, enterprise-class storage and infrastructure platform, with Storage Spaces Direct and Azure Stack™ HCI. It's already familiar to users who know Microsoft™ environments.

ACCELERATE WORKLOAD TIME TO VALUE

Lenovo ThinkAgile MX Certified Nodes powered by Intel® Xeon® Scalable processors are HCI building blocks built with certified hardware, so you can deploy workloads and scale infrastructure with speed and precision. ThinkAgile Advantage support adds software and hardware management, to make sure you get the most from your solution throughout its lifecycle.

SIMPLIFY MANAGEMENT

Managing IT is easier and faster when you can do it all from one intuitive interface. With ThinkAgile MX you can manage infrastructure, virtual machines and the whole Microsoft™ ecosystem from a single pane of glass, thanks to the seamless integration of Lenovo XClarity, Windows™ Admin Center and Azure Stack™

TAKE THE SIMPLE PATH TO IT VALUE

Today's workloads need to run on powerful infrastructure. But, if your IT is too complex, time-consuming and unreliable - or, if it isn't ready, for the hybrid cloud future - it won't deliver the value you need.
